

CITIZEN'S VIEW OF LAKEFRONT PLAN

Regarding plans to do a land fill in the lake from 71st to 75th streets, it is clear that Friends of the Park (FOTP) wants to take private lake access from every citizen in Chicago.

Currently, property is being rented, sold, and bought in this area on a regular basis. However, if some of the current plans are successful, no one will ever be able to rent, sell, or buy one inch of property that has lake access in the city of Chicago.

When FOTP started this project they were talking about two miles on the north side and two miles on the south side. Now, they're only concentrating on the two miles on the south side.

If you ever thought you'd like to live by the lake, now is your time to speak up, before the land fill proponents spoil the natural shore line.

The city has almost all of the lake access now, this small portion they're trying to grab up should be left to the citizens of Chicago.

Wonderful organization that FOTP is, they do not really have authority to speak for all the citizens of Chicago.
